

**“smart” CHECK LIST©**

Notes:

1. This document might be outdated. Check the header area for revision date. Please download the latest version at <http://www.byunpartners.com/Documents/checklist.pdf>
2. Please use this checklist to stimulate your thought. Add, delete, and revise as needed and submit to spec writer. By no means this check list has everything you need for your project. However, this check list should be completed prior to embarking on writing specification. Undoubtedly you will find items required for your project beyond this check list.
3. The specification describes in word “What” the product is. Drawings show “where” the product is used. Need to distinguish if the product has more than one variation. For example GL-1 and GL-2 for different types of glazing.
4. If the specification is to have any real value, project managers must have the opportunity to provide relevant project information to the specification writer.
5. Who should write the spec? If it is on consultants’ drawings, consultants should write it. If it says “See Architectural” then architectural drawings should detail this up and I will further elaborate on spec.
6. Stop. Read the whole documents before filling in the blank spaces.
7. Put question marks for items that are pending or not sure.
8. Again, not all items used in the project are in this lists. Feel free to add for your project.
9. Remember, we can’t be accurate if we are confused.
10. Sustainable Design: Product or product category with  a symbol in front indicates it contributes to one or more LEED, HPI, or CHPS credit category.
11. Before returning completed form back the spec writer, first have it reviewed by the project Architect of Record.
12. Section number are identified with CSI 2004 Format first and 1995 in parenthesis. 024119 (01732).
13. Short spec: Not recommended. Write full specs to get the maximum protection.
14. “smart” because you can look up listed products directly from this document by hyperlink (internet connection required).
15. Feel free to make any suggestions you might have to make this checklist a better tool.
16. This checklist is used for giving you an accurate spec fee proposal. Please be as complete as possible. More sections I need to write, higher the fee.
17. "People don't want to buy a quarter-inch drill, they want a quarter-inch hole". The checklist is a valuable listening tool for spec writer.
18. Spec writers are “generalist” (including me). I write 50 or more architectural sections per project and I don’t know everything. Don’t be afraid to seek help from the specific manufacturer. They are the “specialist” in their products.
19. I DO NOT know and I DO NOT pretend to know “door hardware”. Please hire a door hardware consultant.
20. I am really fast but I do attend seminars regularly and I will be out of the office. Please plan accordingly.
21. Do email manufacturer’s CSI 3-part specs if you have them. But, first edit them. I can’t choose options for you. You are the designer.
  - o Unless, you want me to pick options I like. (Not recommend). Same applies when you email me manuf cutsheets. Select all the options YOU like before emailing them to me.
22. Thank you, thank you, thank you.

**Project Summary**

<b>Project Name</b>	
<b>Project Number</b>	
<b>Client Name</b>	
<b>PM/PA Name</b>	
<b>Scope of Work</b> (Text for Section 01100)	Short summary. Best to be generic. Not too detailed where it becomes scope of work issue where it contradict drawings.
<b>This project is very similar to previous project named</b>	
<b>Construction Type</b>	<input type="checkbox"/> Design – Bid – Build (traditional) <input type="checkbox"/> Design – Build
<b>Contract Type</b>	<input type="checkbox"/> Lease – Lease Back
<b>Header information</b>	
<b>Footer information</b>	Reserved for section number and title. (Recommend not changing the footer at all)
<b>Construction Administration</b>	<input type="checkbox"/> by Architect <input type="checkbox"/> by Construction Manager <input type="checkbox"/> By Owner’s rep.
<b>Submittal method during CA</b>	Electronic: <input type="checkbox"/> Submittal Exchange <input type="checkbox"/> Other _____ <input type="checkbox"/> Paper based.
<b>Architect of Record</b>	Name: _____
<b>CalGreen Code Applicable?</b>	<input type="checkbox"/> Yes, follow this City code: _____ <input type="checkbox"/> No, because: _____
<b>Client Standards</b>	<input type="checkbox"/> Preferred products (Need a copy w/project specific markup. Better than using checklist) <input type="checkbox"/> None.
<b>General Condition (GC)</b>	<input type="checkbox"/> <a href="#">AIA A201</a> <input type="checkbox"/> Custom by Owner/District I need to see current (or at least previous project) GC to coordinate Div 1 sections.
<b>Master</b>	<input type="checkbox"/> Use client’s master (attached- electronic) <input type="checkbox"/> AIA Masterspec (Default) <input type="checkbox"/> SpecsIntact <input type="checkbox"/> Other _____
<b>Spec Format</b>	CSI 2004 format (6 digit section number). 49 divisions. – Default. Please note that CSI 1995 format (5 digit section number). 16 divisions. – No longer supported (AIA MasterSpec no longer updated).
<b>Special Requirements</b>	<input type="checkbox"/> <a href="#">USGBC - LEED</a> , Level: _____ <input type="checkbox"/> <a href="#">CHPS</a> <input type="checkbox"/> <a href="#">DSA</a> <input type="checkbox"/> None Email score card.
<b>Deferred Approvals</b>	<input type="checkbox"/> Fire Sprinklers <input type="checkbox"/> Elevator <input type="checkbox"/> Other: _____ <input type="checkbox"/> None
<b>Fire-Rated Assemblies</b>	Fire-rated construction for Elec, Mech, and Storage Rooms: <input type="checkbox"/> Yes <input type="checkbox"/> No Fire-rated construction for Area Separations: <input type="checkbox"/> Yes <input type="checkbox"/> No All gypsum board will be Type X 5/8 inch regardless of fire-ratings required.
<b>Building Type</b>	<input type="checkbox"/> Type I <input type="checkbox"/> Type 3 <input type="checkbox"/> Type V <input type="checkbox"/> Type VB <input type="checkbox"/> Other: ____ <input type="checkbox"/> CMU <input type="checkbox"/> Concrete
<b>Stud Framing</b>	<input type="checkbox"/> Steel framing (sections 05400 by structural consultant & 09111 by Architect) <input type="checkbox"/> Wood framing (section 06100 by structural consultant)
<b>Building</b>	<input type="checkbox"/> Single story <input type="checkbox"/> Two stories <input type="checkbox"/> [ _____ ] stories
<b>Alternates (ALT)</b>	<input type="checkbox"/> As indicated on Drawings <input type="checkbox"/> None <input type="checkbox"/> List: _____ Definition: An amount proposed by bidders and stated on the Bid Form for certain work defined in the bidding requirements that may be added to or deducted from the base bid amount if Owner decides to accept a corresponding change either in the amount of construction to be completed or in the products, materials, equipment, systems, or installation methods specified.
<b>Allowances (ALLOW)</b>	<input type="checkbox"/> As indicated on Drawings <input type="checkbox"/> None <input type="checkbox"/> List: _____ Types: <input type="checkbox"/> Lump-sum allowances. You have to specify the dollar amount. <input type="checkbox"/> Unit-cost allowances. (Also require unit price section) <input type="checkbox"/> Quantity allowances. (Also require unit price section) <input type="checkbox"/> Contingency allowances. <input type="checkbox"/> Testing and inspecting allowances.
<b>Unit Price</b>	<input type="checkbox"/> As indicated on Drawings <input type="checkbox"/> None <input type="checkbox"/> List: _____ Definition: Unit price is a price per unit of measurement for materials, equipment, or services, or a portion of the Work, added to or deducted from the Contract Sum by appropriate modification, if the scope of Work or estimated quantities of Work

	required by the Contract Documents are increased or decreased.
<b>Units of Measure</b>	<input type="checkbox"/> Inch, Feet/Pounds only (default) <input type="checkbox"/> Metric only <input type="checkbox"/> Both
<b>Project Meeting Attendance by Architect</b>	Required number of meetings _____ (provide copy of language) Scheduled visits required _____ (provide copy of language) *Verify with Owner/Architect Contract
<b>Coordinate with Mechanical Consultant (for their energy calc)</b>	<input type="checkbox"/> Fenestration: U-factor: _____ SHGC: _____ <input type="checkbox"/> Skylight: U-factor: _____ SHGC: _____ Insulation: (Identify on Drawings) Roof <input type="checkbox"/> R-30 <input type="checkbox"/> Other: _____ Exterior Walls <input type="checkbox"/> R-13 <input type="checkbox"/> R-19 <input type="checkbox"/> Other: _____
<b>Project Team:</b> NOTE: Signature page and routing of it is not part of fee. Route them internally.	List only consultant that will be providing CSI 3-part specs here: <input type="checkbox"/> Civil: <input type="checkbox"/> LEED: _____ <input type="checkbox"/> Landscape: <input type="checkbox"/> CxA: _____ <input type="checkbox"/> Structural: <input type="checkbox"/> Mechanical: <input type="checkbox"/> Electrical: <input type="checkbox"/> Plumbing: Hardware: <input type="checkbox"/> Allegion ( <a href="#">IRCO</a> ) <input type="checkbox"/> <a href="#">Assa Abloy</a> <input type="checkbox"/> AHC (John Elmore) for fee. <input type="checkbox"/> In-House <input type="checkbox"/> Communication: <input type="checkbox"/> Audio Visual: <input type="checkbox"/> Kitchen Equipment: <input type="checkbox"/> Interior Designer: Others: _____
<b>Print Instructions</b>	<input type="checkbox"/> Electronic (pdf, FTP) <input type="checkbox"/> Print Double Sided (default) <input type="checkbox"/> Print Single Sided
<b>Font Type/Size</b>	<input type="checkbox"/> Times New Roman/11 pt. (default) <input type="checkbox"/> Other: _____
<b>Special Instructions</b>	

Before returning completed form back the spec writer, first have it reviewed by the project Architect of Record.

### DEMOLITION

<b>Demolition</b>	<input type="checkbox"/> Partial interior demolition - Selective Demo 024119 (01732). <input type="checkbox"/> Complete demolition of building - Building Demo 024116 (02221) <input type="checkbox"/> Site demolition. <input type="checkbox"/> Abatement contractor – Separate contract. <input type="checkbox"/> Abatement is part of this contract – Show have Abatement report ready
-------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### WATERPROOFING

<b>Foundation Prep (Soils report should be reviewed for recommendations)</b>	Underslab Vapor Barrier – 033005 (07113): Manufacturers: <input type="checkbox"/> <a href="#">Stego 15 mil</a> <input type="checkbox"/> <a href="#">Perminator WR Meadow</a> <input type="checkbox"/> Other: _____ 15 mil sheet, Class A (default): <input type="checkbox"/> By Structural (default). <input type="checkbox"/> By Architect * ASTM E 1745 sets three performance classes for plastic water-vapor retarders: Classes A, B, and C. The maximum water-vapor Permeance value of 0.3 perms is the same for each class. Two durability tests differentiate each class. Class A sets the highest, and Class C the lowest, tensile strength and puncture-resistance requirements. Neither thickness nor type of plastic is governed by ASTM E 1745.
	Dampproofing - 071113 (07115): Fluid applied to footing etc. <input type="checkbox"/> <a href="#">Sealmastic Type II Fibered by W.R. Meadows.</a> <input type="checkbox"/> Other: _____
<b>Waterproofing - 071326 (07131) [Normally for below grade]</b>	Vertical Application: <input type="checkbox"/> Self-adhering sheet waterproofing ( <a href="#">Bituthene 3000 by Grace</a> ) with drainage mat and then back-fill. <input type="checkbox"/> Blind-side - drainage mat and sheet waterproofing ( <a href="#">Preprufe 160R HDPE by Grace</a> ). Drainage Panel: <input type="checkbox"/> <a href="#">Hydroduct 220 by Grace</a> . Perimeter Drain: <input type="checkbox"/> <a href="#">Hydroduct Coil 600 by Grace</a> . <input type="checkbox"/> Plumbing pipe by civil.
	Horizontal Application: <input type="checkbox"/> Between slabs: Sheet waterproofing. ( <a href="#">Bituthene 3000 by Grace</a> ) <input type="checkbox"/> Foundation below slab: Upside-down <a href="#">Preprufe 300 HDPE</a> in water table. (3x \$ Florprufe) <input type="checkbox"/> Foundation below slab: <a href="#">Florprufe 120</a> . (21 mil, more of vapor barrier).

### JOINT SEALANTS

<b>Sealants</b>	<input type="checkbox"/> Through-penetration firestop - 078413 (07841). <input type="checkbox"/> Fire-resistive joints - 078446 (07841). Standard - 079200 (07920). Application: <input type="checkbox"/> Interior <input type="checkbox"/> Exterior Substrates: <input type="checkbox"/> Metal <input type="checkbox"/> Wood <input type="checkbox"/> Gypsum <input type="checkbox"/> Other: _____
-----------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**STRUCTURAL CONSULTANT (for his information)**

<b>Concrete slab (floor)</b>	Cast-In-Place Concrete - 033000 (03300)
<b>Concrete formed (wall)</b> Cast-In-Place Concrete - 033000 (03300).	
Structural Steel	<input type="checkbox"/> Structural Steel - 051200 (05120) <input type="checkbox"/> None.
Metal Deck 05310	<input type="checkbox"/> Standard type (by structural). Architecturally Exposed - Decorative type by Epic: <input type="checkbox"/> <a href="#">Epicore ER2RA</a> , acoustical, NRC 0.95. <input type="checkbox"/> <a href="#">Epicore 3.5A by Epic</a>
Steel Framing	<input type="checkbox"/> Exterior Cold-form - 054000 (05400) - by structural consultant <input type="checkbox"/> Interior metal studs - 092216 (09111) <input type="checkbox"/> None.

**ROOFING**

**Huge Disclaimer: Roofing/Waterproofing Systems are specialized assemblies that are beyond my expertise. Please contact your favorite manufacturer and seek help with specs and drawing details. Do not design them in a vacuum (you will have change orders). Have the manufacturer’s rep edit their standard spec for your project. I can’t edit their spec (again, you will have change orders if you have me edit).**

<p><b>Roofing</b>                  Fire: <input type="checkbox"/> (UL Class A)                  Wind: <input type="checkbox"/> I-75                  Factory Mutual (FM): <input type="checkbox"/></p>	<p>Slope Type: Low (flat) Roofs: Single-Ply                  075419 (07540) Thermoplastic Membrane Roofing   <input type="checkbox"/> Sarnafil - default, <input type="checkbox"/> <a href="#">Cool Zone by Duro-last</a> <input type="checkbox"/> <a href="#">Sure-Flex by Carlisle</a>                  Attach membrane:  <input type="checkbox"/> Adhesively (<a href="#">G410 Sarnafil</a>)-feltback to densdeck (default) concrete, wood, metal deck.  <input type="checkbox"/> Mechanically (<a href="#">S327 Sarnafil</a>) - with plates for wood or metal deck.</p>

**STAIRS/ELEVATORS**

Identify a stair number when more than one stair exists for a project. (Do the same for elevators)

**Huge Disclaimer: Elevators/Lifts are specialized equipment that is beyond my expertise. Please contact your favorite manufacturer and seek help with specs and drawing details. Do not design them in a vacuum (you will have change orders). Have the elevator rep edit their standard spec for your project. I can't edit their spec (again, you will have change orders if you have me edit).**
